

## Business Information Systems (BIS) Major

### Course Enrolment Planner

At Sydney International, our courses put you at the heart of the field that is driving our world forward. We have designed our Bachelor of Information Technology course so that if you want to be a cyber security analyst, network engineer, data analyst, software developer, IT project manager, business analyst, design multimedia experiences, or develop smart systems for the future, this course will give you the technical, analytical and creative skills to develop solutions, innovate and be successful in the information economy.

Topics include an in-depth exploration of IT infrastructure technologies; the technical and business elements required to analyse, design, implement, manage, and support complex IT resources; transformative business solutions; enterprise architecture; networks, virtual and cloud-based deployment.
