## Why Sydney International

The Master of Information Technology (MIT) puts you at the heart of the field that is driving our world forward. This degree will give you the technical, analytical and creative skills to develop solutions, innovate and be successful in any IT role in the information economy. It is designed to provide you with specialist skills in Information Technology combined with relevant business skills. The course will include three specialisations:

**Digital Leadership**

**Cyber Security**

**Data Analytics**

Our Master of IT has a strong industry focus and offers a choice of three specialisations, Digital Leadership, Cyber Security, and Data Analytics.

The choice of these three specialisations is based on the current and future demand providing different career pathways for applicants with different backgrounds and interests.

Our Master of IT prepares students for employment with a combination of technical and management skills. Those who are more interested in managerial roles in IT can choose the Digital Leadership specialisation, while those who are also interested in the technical aspects can choose either Cyber Security or Data Analytics specialisations.

The course prepares the graduates to have the capacity to analyse real-world IT problems and offer solutions to solve such problems.

This is designed to set you up effectively for your future career as an IT professional.

On campus resources include IT Labs, workshop areas, learning materials, and a Library & Student Success Hub. Our courses are also very flexible – you can undertake them at a pace that suits you (subject to VISA requirements).

Sydney International offers innovative courses approved as meeting the Australian Qualifications Framework, and are designed to meet the requirements of the Australian Computer Society (ACS).

## Graduate Certificate in IT and Graduate Diploma of IT

Talk to us about our Graduate Certificate in IT and Graduate Diploma of IT courses if you are not eligible to start the Master of IT course right now. When you graduate from one of these postgraduate qualifications you will be eligible to enter the Master program in 2nd Trimester (GradCert) or 3rd Trimester (GradDip).
